EDUCATION

Thakur Polytechnic

Diploma in Computer Engineering – 85.96%

NMIMS Deemed-to-be-University, MPSTME

B.Tech in Data Science – CGPA: 8.20/10

Mumbai, India

2022 – 2025

Mumbai, India

2025 – 2028

PROJECTS

BACKBONE – Longitudinal Health Analysis | Flutter, React, TypeScript, Ollama, OCR | [GitHub](#) Aug. 2026 – Sept. 2026

- Built a local-first platform that transforms fragmented medical records such as lab reports, prescriptions, and discharge summaries into a chronological patient timeline without sending data to external AI APIs
- Developed a document pipeline combining PDF processing, OCR fallback, medical entity extraction, and temporal ordering to organize diagnoses, laboratory results, medications, symptoms, and clinical events
- Integrated local Ollama inference with Qwen3 1.7B in the web application and built a cross-platform Flutter mobile application with SQLite-based local storage
- Built an AI evaluation suite with 40+ test documents covering medical extraction scenarios, hallucination checks, and diagnosis-qualifier cases

IPL Match Predictor | Python, Scikit-learn, Flask, Pandas | [Live](#)

Apr. 2026 – May 2026

- Built a two-model ML system on 10+ seasons of ball-by-ball data: a live in-game win predictor achieving 75% accuracy and a pre-match classifier achieving 59% accuracy
- Deployed as a Flask REST API that ingests live scorecard data and recalculates win probabilities every delivery, with consistent sub-500ms response times

CogniScan | Python, OpenCV, Speech Recognition, Machine Learning | [GitHub](#)

Feb. 2026 – Mar. 2026

- Prototyped a multimodal system that combines real-time facial-expression analysis and speech features using OpenCV and speech-processing pipelines to explore emotion and cognitive-state signals
- Built a machine-learning pipeline to extract and combine visual and speech features for downstream classification

EXPERIENCE

ZeroOne Tech Labs LLP

Mar. 2026 – June 2026

Frontend Developer Intern

Mumbai, India

- Built a library of 10+ reusable React.js and Tailwind CSS components used across 3 product modules, cutting UI build time by 35% and improving Lighthouse score from 68 to 91
- Integrated 8+ REST API endpoints with asynchronous data fetching, reducing redundant re-renders and improving data-load performance by 40%

Freelance Full Stack Developer

Jan. 2022 – Present

Web Development, UI Design & Client Delivery

Remote

- Delivered 10+ production websites across e-commerce, healthcare, solar, and jewellery, including Shopify and WordPress storefronts with conversion-focused UX
- Building the full frontend for Gulmohartree Healthcare Pvt. Ltd., including component architecture, UI system, responsive implementation, and deployment

Havoc Games

Dec. 2025 – Feb. 2026

QA Game Tester

Remote

- Documented 50+ reproducible bugs, validated fixes, and supported pre-release quality assurance across game builds

IOFT

May 2024 – Jun. 2024

AR/VR Developer Intern

Mumbai, India

- Developed a Unity-based VR car showroom and contributed to an AI-powered AR body-scanning application and IoT smoke/fire alert system

TECHNICAL SKILLS

Languages: Python, C/C++, Java, Dart, JavaScript, TypeScript, HTML/CSS

AI & ML: Scikit-learn, Pandas, NLP, OCR, OpenCV, Local LLM Inference, Ollama, Qwen

Frontend & Mobile: React.js, Flutter, Tailwind CSS, Liquid (Shopify), WordPress

Backend & Tools: Flask, REST APIs, SQLite, Supabase, Firebase, Git, Vercel, Figma, Unity

ACHIEVEMENTS

Hackathons: Participated in 8 hackathons, including Smart India Hackathon 2025 & 2026; Certificate of Merit, NeoFuture Hackathon

Certifications: Web Development, Unity (IOFT)
